Tara McKeown is a Nurse Practitioner at the Hospital for Sick Children, in Toronto Canada, in the department of Pediatric Neuro-Oncology. She is a leading expert in the management of side effects from trametinib in pediatric patients. She began working with trametinib and other MEK Inhibitors during its infancy in phase 1 clinical trials for patients with brain tumors and NF1. Her expertise and extensive clinical knowledge of MEK Inhibitors has been sought after by colleagues from around the world.
